

## Anemometer with Temperature

### Description:

The model H400 is an easy to use anemometer with temperature meter. It is the perfect meter for measuring both wind speed and temperature.

### Features:

- Measure both temperature and air flow
- Selectable °C & °F measurements
- Displays air flow in m/s, km/h, mph, knots & ft/min
- Air velocity range: 0.9 to 55.9mph
- Temperature range: 32 to 122 degrees F (0 to 50 degrees C)
- Two year warranty

### Applications:

- HVAC
- Energy audits
- Environmental experiments
- Building maintenance
- Agriculture
- Science experiments
